INSTRUCTIONS FOR FILING FORM R-B, GASOLINE AND/OR CYCLING PLANT CONTINUATION FORM

Purpose of Report

The continuation form provides additional space for reporting transactions that would usually be listed on Part 1 or Part 2 of the report. Form R-B is a general continuation form that can be used to report acquisitions of gas (Part 1 of the R6 report) or acquisitions and dispositions of oil (Part 2 of the R6 report).

Instructions For Form R-B

1. The company name, facility name, month, year, reporting code and selection of ORIGINAL or CORRECTION at the top of the form should be identical to the information on Part 1.
2. Check the appropriate square to indicate whether oil or gas transactions are being reported on this page. Use separate pages for reporting oil and gas transactions.
3. Acquisition and disposition groups are listed on the reverse side of Part 1 and Part 2. Only groups that contain multiple lines (require line numbers) may be reported on the continuation form.
4. Acquisitions are to be listed on the left side of the form. Dispositions are listed on the right side of the form. Enter group codes in numerical sequence. Enter the group code on the first line and draw a continuation arrow through the group code column of all lines in that group.
5. Each separate group must begin with line number 1. Additional lines should be entered in numerical sequence.
6. Enter codes and descriptions required for entries within that group. (see list of group codes and required descriptions on the back of Part 1).
7. Leave at least one blank line between groups on the continuation form.
8. Use additional continuation forms as needed.

Making Corrections on Reports - Do not use any type of correction fluid to cover figures to be changed or corrected.

File the corrected report giving the pertinent information with respect to the Transporter, Plant or Refinery name and code number, report month and enter only the lines that contain corrected data, the Group code and original line number and the description for those items to be corrected. If a line is to be added, enter the line within the proper group code in line number sequence. This line number should be the next number after the last line number entered within that group code on the original report. Lines may be deleted by entering the line as it appeared on the original report with a volume of zero. **IMPORTANT:** The total acquisition volume must agree with the total disposition volume on said report. Mark the correction box with an "X" on said report.
